## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07.06.04 has been entered.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-4, 8-10, 12-31, 48-50, drawn to a method for deriving quantitative information from an X-ray image in a network environment, classified in class 382, subclass 132.
  - II. Claims 32-47, drawn to an X-ray assembly, classified in class 378, subclass 54.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated since invention I is drawn to a method for analyzing/ determining quantitative information from an X-ray image in a network environment, whereas invention II is drawn to an X-ray assembly including an X-ray film holder, X-ray film and calibration phantom. Examiner concludes that inventions I and II have different modes of operation, different functions and different effects.

Art Unit: 2882

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
